

Corporate Finance

Our specialist Corporate Finance team offers both a bespoke service to clients, and a highly confidently and targeted approach to candidates. Servicing the world of Securities Houses and M&A Boutiques as opposed to concentrating on the larger institutions has allowed us to gain considerable expertise in the area. With a highly developed contact base that keeps our fingers on the pulse of the market, and an excellent history in the placement of both seniors and juniors, NOMADS, originators and interns from a variety of backgrounds- our market knowledge and understanding is second to none.

We offer a global service with geographic coverage of the Middle East, Far East, Europe and the United States along with our core business in the United Kingdom, we offer a service that finds the right person for the right position.

In addition to our core Corporate Finance work, we also provide professionals in the related areas of Equity Research, Capital Markets and Private Equity, servicing the City's top financial institutions.
